

**June 16-17, 2026**

# **Enrich Inventory and Preventive Maintenance**

## **Course Purpose**

Equip users with the knowledge and tools to manage Inventory effectively, reducing redundancies and overstock. Ensure Preventive Maintenance (PM) programs are configured for efficiency and compliance without manual intervention.

## **Why You Should Attend**

- Standardize inventory processes across the organization.
- Improve profitability through efficient stock management.
- Reduce errors and rework through structured workflows.
- Enhance customer trust through compliance and accuracy.

## **What You'll Gain**

- Improved confidence in managing service workflows.
- Reduced manual effort through automation.
- Lower maintenance costs and reduced obsolescence.
- Reduced downtime through adherence to service intervals.

## **Hands-On Learning**

Participants will work through real-world Enrich scenarios using practical examples and business cases.
